

Eco 2000 S 17.1

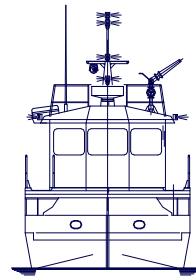

Eco 2000 S 17.1

The Eco 2000 s, is the result of development of the highly successful Eco 2000. The Eco 2000 s has a maximum speed of 12 knots, a cruising speed of 9 knots and a working speed of between 0 to 2 knots. It has been certified by the Italian Naval Registry and by the Maritime Authority for Rec-oil services in dangerous oil spill areas as it is able to work safely wherever the inflammability point is less than 60°.

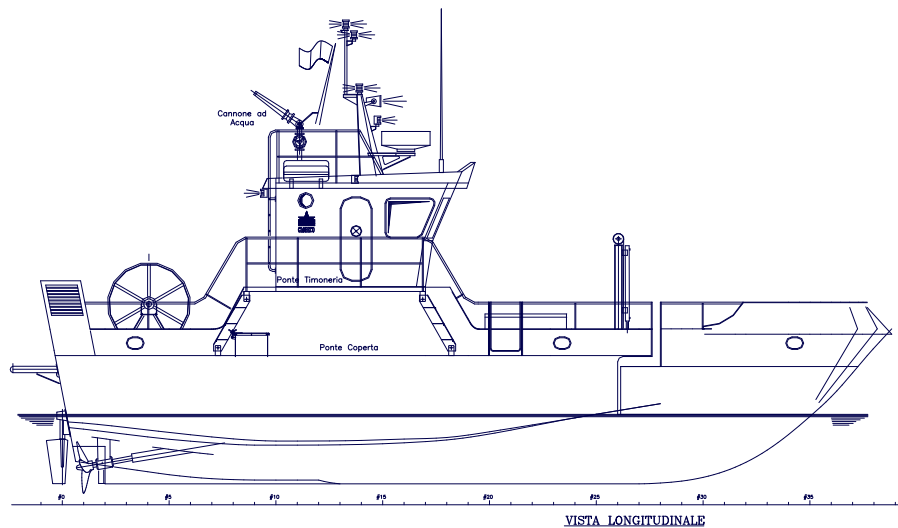

It carries out the following services:

- collection of oily products from the water's surface, storage on board;
- collection of floating and semi submerged solid waste, storage on board;
- water oxygenation;

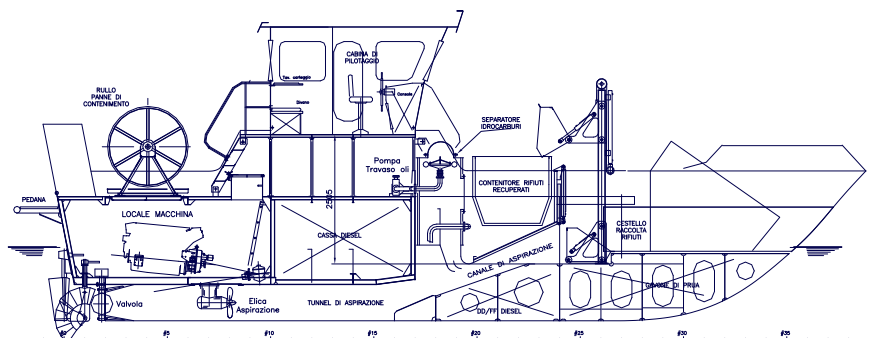

- chemical dispersant spraying;
- isolation of polluted areas using floating booms;
- cleaning of quays and shoreline, fire-fighting;
- monitoring and analysis of waters;
- general environmental and safety supply services.

Two units have already been built and are operating in Saudi Arabia and in Italy.
